Julio, I'll talk to the Water Maintenance department about having water and sewer services marked. I'll get back to you when I have a response of when the marking will be happening.

Dear Mr. Moreno,

I'm the EPA Project Manager for the 18 Mile Creek OU4 Lead-Contaminated Residential Properties in Lockport, NY. Jackie Kondrick, PM for the other Operable Units provided me with your information. We are delineating and sampling the below list of properties and are missing the water and sewer lines from our maps. Do you have any maps showing these features? If not, can you direct me to someone that can help me.

Appreciated.

Julio F Vazquez

Julio,

The last trip it appeared that the waterlines and sewer were **not** identified, marked out, in the steets, generally the town does this I believe for water and sewer.

Can you reach out to the Mayor's office, or a point of contact up there, and request these mains and laterals are properly identified prior to us coming. We don't want to hit a water line.... It is supposed to be part of the 1-800 dig # but if the town does not do it..... Ask them if they have a maps as to water and sewer design for the area.

Right now we plan to go back up **June 9th**, data permitting.
We may have ½ the risk data back Thursday
